

Jusha CP620

6MP Portable Medical Display

1. Why we need?

Current Problems

- Desktop monitor too heavy to move
- Some laptop do not have touch screen
- Traditional tablets
 - do not meet DICOM standard
 - do not have QA for checking and calibration
 - can not support dual input
 - Not enough resolution
 - Not bright enough

Key Features

- 11.5mm, 750g
- Portable for mobile reporting
- DICOM calibrated
- Qualitas QA compatible
- Dual-screen
- Auto rotate
- Ambient light monitoring
- Touch Screen
- High resolution
- One cable connection

Comparing with desktop 12MP monitor

How do you build a mobile radiology reporting kit that actually allows radiologists to work when they're on the road?

Dr Imran Lasker and James Longworth from our IT team go under the hood of the new mobile reporting kit.

Jusha CP620 G is the thinnest and lightest monitor I've come across, making it incredibly portable. It also comes with an elegant protective case that adds both style and practicality.

The customer care experience was flawless, from ordering to delivery, to assistance everything was handled perfectly. A big thank you to Ivy Fang for the excellent support!

Highly recommended for any radiologist on the move.
